

Thank you for your email to the Principal.

I have included Mrs Allen in my response as I know you have been in been extensive correspondence with her about the improvements to University Avenue.

As you know, our first priority has been to improve safety for pedestrians as the largest number of users of University Avenue. However, we are also exploring further works on University Avenue with the focus on achieving effective segregation of different transport modes. The University will seek feedback on any future proposals and will of course ensure that your group is kept informed throughout the process.

We are also considering cycling as part of our active travel plans – in particular, we are investing in facilities on campus to support cycling and enhancing wayfinding with the aim of reducing the need for cyclists to use the public road.

Finally, our Sustainability Working Group has scheduled time to discuss provision for cyclists at our next meeting. I hope this will help to keep the focus on cycling and perhaps generate new ideas which we can consider going forward.

Yours sincerely

David Duncan
